PROFILE

Developer with 3 years of experience specializing in both backend and frontend development. As an early member of a startup, played a key role in the end-to-end development process, from feature creation to system design. Gained substantial hands-on experience in building and scaling products, with a focus on aligning technical solutions with business goals. Strong communication skills facilitate effective collaboration between technical teams and stakeholders, ensuring successful project outcomes.

WORK EXPERIENCE

Back-end Developer

wmh-korea(South Korea)

2022-2023

- Backend Development with Spring Boot: Actively contributed as a key team member in the development of robust and scalable applications using Spring Boot, ensuring high-quality code and adherence to project timelines.
- Database Design & Query Optimization: Played a vital role in designing database schemas and optimizing queries, ensuring both data integrity and system performance across various applications.
- CMS Website Development: Successfully participated in the development and maintenance of CMS websites, focusing on enhancing user experience and ensuring efficient content management.
- System Maintenance & Upgrades: Provided essential support for ongoing system maintenance and upgrades, ensuring the platform's continuous operation and quick issue resolution.
- Collaboration with Designers and PMs: Collaborated smoothly with designers and project managers to meet project goals and user requirements.

Web Developer & Maintenance

NextGuide(South Korea)

2021-2022

- Technologies: Proficient in Java, JSP (JSTL), Oracle, Tiberio, and PostgreSQL for robust web development.
- Project Experience: Developed and maintained a performance management system solution, ensuring its reliability and scalability.
- Web Standards: Specialized in web standardization, optimizing websites according to HTML5 and CSS3 standards for maximum compatibility and performance.

Data Internship

Hyosung (South Korea)

2020

- Selected as a Public Data Intern for the Ministry of the Interior and Safety's Data Dam project, working at a government-related institution in Incheon, focusing on public data management and security.
- Chosen as a Quality Management Intern to analyze system databases, including contract management systems, and further enhanced skills through a data analysis course after the internship.
