

Jisun Lee

Software Engineer

Vancouver, BC (+1) 236-688-7926 leejisun.it@gmail.com

Profile

Developer with 3 years of experience specializing in both backend and frontend development. As an early member of a startup, played a key role in the end-to-end development process, from feature creation to system design. Gained substantial hands-on experience in building and scaling products, with a focus on aligning technical solutions with business goals. Strong communication skills facilitate effective collaboration between technical teams and stakeholders, ensuring successful project outcomes.

Skills

Java, Spring boot, Python, Next.js, PHP, HTML, CSS, Javascript, React.js, Webflow, Wordpress, mysql, Oracle, PostgreSQL, MongoDB, Supabase, AWS EC2, Docker, Testing & Maintenance

Experience

wmh-korea – Full-Stack engineer

June, 2022 - May, 2023(11months)

- Led key backend development for a Spring Boot web application, implementing critical features from initial architecture design to production deployment while consistently meeting all project deadlines.
- Played a vital role in designing database schemas and optimizing queries, ensuring both data integrity and system performance across various applications.
- Successfully participated in the development and maintenance of CMS websites, focusing on enhancing user experience and ensuring efficient content management.
- Provided essential support for ongoing system maintenance and upgrades, ensuring the platform's continuous operation and quick issue resolution.
- Collaboration with Designers and PMs: Collaborated smoothly with designers and project managers to meet project goals and user requirements.

NextGuide – Full-Stack engineer

Mar, 2021 - June, 2022(1year 3month)

- Proficient in Java, JSP (JSTL), Oracle, Tiberio, and PostgreSQL for robust web development.
- Developed and maintained a performance management system solution, ensuring its reliability and scalability.
- Specialized in web standardization, optimizing websites according to HTML5 and CSS3 standards for maximum compatibility and performance.

Hyosung – Data Intern

June, 2020 ~ Dec, 2020(6 months)

- Selected as a Public Data Intern for the Ministry of the Interior and Safety's Data Dam project, working at a government-related institution in Incheon, focusing on public data management and security.
- Chosen as a Quality Management Intern to analyze system databases, including contract management systems, and further enhanced skills through a data analysis course after the internship.

EDUCATION

June, 2024 - June, 2025

Tamwood College, Web development

Feb, 2015 - Feb, 2020

Suwon University, Bachelor's Degree in Information Security
